

WATERBORNE FLOOR COATINGS

RD-HYDROPOX

Very hard and abrasion resistant epoxy coating

- Forms a hard and resistant film easy to clean and to decontaminate.
- Excellent resistance to various aggressions, including carbon black from tyres, greases, etc.
- Adheres directly to concrete, tiles, brick, etc.
- Approved for use in the food industry.

RD-Hydropox is a lasting solution for floors subject to heavy traffic. It is free of VOCs and can be used inside buildings without necessarily having to contain the area during the application. It reduces costs and disturbances. **RD-Hydropox** can also be applied on walls subject to various kind of contaminations. The film can be easily cleaned and decontaminated through various means.

A special version for Green Concrete is available: **RD-Hydropox H**
